

## **Irrigation Technician**

**Position Overview: This is a full-time opportunity with a benefits package.**

Join West Michigan's largest landscape management company as an Irrigation technician! In this dynamic role, no two days will be the same as you troubleshoot and optimize commercial irrigation systems. You'll work with a diverse team of experienced professionals who can assist when you need it and give you space when you need to see the problem through on your own. You'll be equipped with the time saving tools like remotes and golf carts, among others, to shrink that 30 acre property right down to size! All experience levels are welcome to apply since there are multiple opportunities in a couple different disciplines such as installation, plumbing, service work, programming, and much more. Lastly, this position is one where you can stick around! We want to see you making money all year long around so our technicians work in our snow operation or on handyman projects throughout the winter season.

*You can build your future right here! DJ's has boasted healthy company growth for more than a decade. This has led to excellent opportunities for motivated team members to grow their careers and improve their quality of life. DJ's seeks individuals with a professional demeanor who will strive to be a leader in our industry, and who are ready to grow their careers among other professionals in a dynamic company. Apply today for a chance to become a part of this growing and motivated team.*

### **Responsibilities include:**

- ◆ Completing a list of written work orders on a daily basis centering around irrigation system service.
- ◆ Safely operating a truck and trailer to a list of job sites to complete your work.
- ◆ Listening and positively interacting with customers.
- ◆ Completing irrigation service work to the specifications provided.
- ◆ Showing initiative and hustle.
- ◆ Keeping a positive and open attitude.

### **The following skills/qualifications will serve you well in this position:**

- ◆ 1-3 years of Irrigation system experience, service or installation.
- ◆ Knowledge of plumbing tools, pipe sizing, and other equipment and supplies used in this trade.
- ◆ Ability to accurately read blue prints and as-built's.
- ◆ Electrical / mechanical background.
- ◆ Chauffeur's License (or ability to obtain one.)
- ◆ Drain tile / underground installations
