

## Lawn Care /Fertilization Technician

**Position Overview: This is a full-time opportunity with a benefits package.**

Join West Michigan's largest landscape management company as a lawn care technician! Our Lawn Care department continues to expand, creating opportunities for qualified individuals to show their professional skill caring for the turf of our clientele. The lawn care technician is responsible for completing fertilizer & pesticide applications, core aeration, turf insect & disease identification, and all other lawn care related services. We equip our technicians with all the tools needed to be successful, including the latest model Z-Spray machines to keep your feet off the ground! We take a team approach to work, meaning team members are paid hourly and are not required a square footage quota per week/month and are not required to sell their own work, making your daily routine less stressful. You'll be able to take great pride in your work as our clients are well-known across West Michigan, allowing your hard work to always be on display. During the off-season, you'll be able to stay busy helping with snow related operations and equipment reconditioning.

*You can build your future right here! DJ's has boasted healthy company growth for more than a decade. This has led to excellent opportunities for motivated team members to grow their careers and improve their quality of life. DJ's seeks individuals with a professional demeanor who will strive to be a leader in our industry, and who are ready to grow their careers among other professionals in a dynamic company. Apply today for a chance to become a part of this growing and motivated team.*
