

Plant Health Care Technician

Position Overview: This is a full-time opportunity with a benefits package.

Join West Michigan's largest landscape management company as a Plant Health Care Technician! Our tree and shrub care department continues to expand, creating opportunity for qualified individuals to show their professional skill caring for the trees and shrubs of our clientele. Within our tree and shrub care department, a Plant Health Care Technician is responsible for the prevention of insect and disease damage on trees and shrubs through foliar applications and systemic injections, as well as pruning and removal of trees from the ground and aloft. Each day is a new experience with the opportunity to learn and enjoy some of the most beautiful landscapes in West Michigan. The variety in this position allows for a deep interest in both pruning and plant health care and provides a balance between mental and physical demands as this position will be an even mix of both on a daily basis. This position is well-suited for an arborist-in-training, eventually obtaining full certification.

You can build your future right here! DJ's has boasted healthy company growth for more than a decade.
